Art –

Please update the recommendation on the last page as follows.

In 2019, the Navy issued two draft addenda evaluating the long-term protectiveness of the RGs. The Navy finalized the first addendum, evaluating the protectiveness of the soil RGs, in June 2020. The Navy issued the second addendum, evaluating the protectiveness of the building RGs, in October 2019. In August 2020, EPA provided written comments to the Navy on the draft building addendum ~~and is awaiting the Navy's response~~. The Navy and EPA subsequently exchanged letters dated December 11 and December 22. EPA is awaiting the Navy's response to its December 22 letter. The Region has consulted with EPA Headquarters (FFRO and OSRTI) as part of the evaluation because of national issues raised by the evaluation. The primary unresolved issue is the use of Argonne National Laboratory's RESRAD BUILD calculator to evaluate radiation risk to human health rather than EPA's Building Preliminary Remediation Goal (PRG) calculator.

Karen will respond on the recommendations on the first two pages.

Wayne:

Karen:

The **Five Year Review Report Issues and Recommendations** updates are due to me by Thursday, January 28, 2021, for the following site:

- o Hunters Point Naval Shipyard (attachment Wayne Praskins 5YR)

You are free to update anything, but the highlighted items must be (or should be considered to be) updated.

Please let me know if you can not meet this due date.

Thank you.
